What is the Suzuki Method?

How does Talent Education differ from other methods of teaching music to children?

- Suzuki teachers believe that musical ability can be developed in all children.
- Students begin at young ages.
- Parents play an active role in the learning process.
- Children become comfortable with the instrument before learning to read music.
- Technique is taught in the context of pieces rather than through dry technical exercises.
- Pieces are refined through constant review.
- Students perform frequently, individually and in groups.

2020 SUMMER STRING CAMP

Summer Camp was a great success! We had 18 violin, viola, and cello students and 6 instructors, plus a parent assisting and cleaning/disinfecting, our accompanist, a student teacher, and a yoga teacher. Our students were beginners through high school and college. All of us were so happy to be together, making music and having fun!
